Findings

None

Method

Each file was opened read-only, hashed in a single pass with the selected algorithms, and checked against a table of file signatures. Every action was written to a hash-chained audit log.

Audit trail

Audit entries	#14 – #16
Log folder	`/tmp/tmp.sVTkOe7IbL/case/runs/rv-hashinv/20261029T110057Z-48a8f9/logs`
Digital signature	This PDF is not digitally signed.

Limitations

- Type detection uses a limited table of common file signatures; unknown types are reported as unknown, not as suspicious.
- Modification times come from the file system of the examined copy and may differ from the original source.
- A result without findings does not prove that a file is authentic or unaltered before acquisition.
- A trusted timestamp proves the audit log existed in this exact form at the stated time; it does not prove that the examined copy matches the original source.
