Customer summary

contrato.pdf · Evidence ID: E0002 · Case: SAMPLE-1

No issues found

The file was hashed and checked. The checks applied found no issues.

Document history

The document was saved once; the file keeps no record of later changes. This information comes from the document itself and is not proof on its own.

What we did

Each file was opened read-only and hashed in a single pass with the selected algorithms. PDF files were then parsed without being modified: every saved revision, its dates and producer, digital signatures, fonts and producer fingerprints were recorded, and pages of consecutive revisions were compared visually. Every action was written to a hash-chained audit log.

What we found

- Producer not in the fingerprint database. The producer “rv-hub sample generator” (revision 1) is not in the fingerprint database used for this analysis.

Digital fingerprint

This fingerprint identifies the exact content of the file. Any change, even of one character, would produce a different value.

sha256	`d231afe23c28b2e88e7b0420ad936fbac8c73dbfa091940c0f2a651c7068949a`

Recommended next step

No action needed for this file.
